

The first entry level, high-resolution book scanner

Find out more about how you can:

- Improve Access to Collections
- Simplify Inter Library Loans
- Increase patron satisfaction
- Increase revenue opportunities
- Preserve your collections

Contact Ristech for a Demonstration today.

The **book2net Spirit** was borne from leading edge book digitization technology. This technology has been used in many leading libraries and government offices. Known for its convenience, quality and speed the **book2net Kiosk** has changed the landscape of the reading room in dramatic fashion!

The **Spirit** is the first affordable, high resolution book scanner for public use. There is no keyboard, no mouse and no software to learn. Simply place the book or document on the gentle cradle and within seconds the patron has a USB image.

- No Paper
- No Toner
- No Waste

The savings don't stop there; the **Spirit** uses considerably less energy than a photocopier and requires a fraction of the maintenance copiers consume. Library staff will never need to remove paper jams or add supplies.

With the Spirit comes Functionality and Simplicity!

Easy to Use

Gentle on Books

Copyright Waiver

Cost Recovery

Reduce Operating Costs

Eliminate Waste

Reduce Energy Consumption

No Software to learn

Multilingual

Cost Recovery

Let us integrate the Spirit with a "card swipe or coin-op". The Spirit can easily pay for itself and generate revenue for your library – with no operating costs!

Ask about our Revenue Sharing Program – No Cost to the Library – Just Revenue Sharing!

Public Use Interface

The Spirit has an embedded touch screen PC that allows users to simply touch an icon and receive a perfect image. No positioning or focusing - it's all automatic!
